

**VICE TV ANNOUNCES NEWEST SERIES  
DARK SIDE OF REALITY TV PREMIERING FALL 2024**

The latest extension of VICE TV's record-breaking Dark Side franchise, *Dark Side of Reality TV* from Railsplitter Pictures and VICE Studios Canada, looks behind the scenes at the most prolific and iconic reality shows of our day - from *Survivor* to the Housewives franchises, *Hell's Kitchen* and beyond.

**BROOKLYN, NY (July 10th, 2024)**-- VICE TV, the Emmy®-winning international television network from VICE Media, announced today the latest installment of the wildly popular Dark Side franchise with *Dark Side of Reality TV* set to premiere on September 3, 2024.

With the "Reality Reckoning" dominating headlines and Bravocons across America revealing what is really happening behind the birkin-bag-clad-confessionals, comes VICE TV's *Dark Side of Reality TV*. This series goes where the cameras didn't dare featuring interviews with America's favorite plastic surgeon, Dr. Terry Dubrow, reality TV's infamous villain Omarosa Manigault Newman, original housewife Vicki Gunvalson and many more. We dive deep beyond the infamous makeovers, romances and eliminations that helped define an entire TV genre, to bring you stories you've never heard before from producers, contestants and crew, painting a realer version of the reality world.

"*Dark Side of Reality TV* is a natural extension for the Dark Side franchise. It will take audiences deeper into the iconic reality moments as only VICE would, from the first tribal council on *Survivor*, up until the recent controversial revelations coming from the *Real Housewives*. We're extremely excited to launch this as the latest iteration in our Dark Side franchise at a time when the genre's influence is more pervasive than ever." said Peter Gaffney, Interim President, Global TV, VICE Media.

*Dark Side of Reality* is executive produced by Matthew Ginsburg and Tim Healy for Railsplitter Pictures, Rosie Taylor and Guillermo Garcia for Vice Studios Canada, and Meghan Payne for VICE TV. Alex McIntosh serves as the showrunner.

*Dark Side of Reality* follows the success of "United Gangs of America", VICE TV's highest-rated new series premiere since 2022 and "UNINTERRUPTED: The Real Stories of Basketball" with LeBron James.

VICE Studios Canada, a VICE Studios Group company, has produced a number of series in the hit Dark Side franchise including *Dark side of the Ring* and *Dark Side of Comedy*. The premium production company also produced *Who Killed the WCW* with Dwayne 'The Rock' Johnson, and *Tales from the Territories* with Johnson's prodco Seven Bucks Productions.

VICE TV is available via all major satellite and cable providers and the VICE TV app via iOS, Android, Apple TV, Roku, and Chromecast. For more information about VICE TV, go to [VICETV.com](http://VICETV.com)
